REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims address an apparatus and method for generating a CT image of a periodically moving/movable object using 3D filtered backprojection where weighting is used which is function of the spatial distance of the ray to the voxel, and where weighting is used which is a function of the time difference from the examination area movement state (as required by independent claims 1 and 23). This feature is neither shown nor fairly suggested in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chesler US 5,079,697 A, Besson *et al.* US 6,459,754 B1, and Nishide *et al.* US 2005/0008116 A1 show CT systems with weights that are a function of distance.
